HC-380

Hot and Cold Automatic
Angle strip cutter

Model HC-380 is a fully automatic hot and cold angle cutting machine with a 4 1/4" (100 mm) wide blade.

Maximum width of cut at 45 degree's is 2 inches.

The 380 is able to automatically do any angle from 0 to 45 degree's.

With a touch of a button you can set any angle you require, no mechanical settings needed. The angle settings for the front and back angles are independently controlled, there's even a setting for counter angles.

The 380 has controllable dwell.
