

# Falcon Air End Cutter

## Falcon Air

Model FAL-A

## Eastman®

*Over a Century of Cutting Expertise*

*Perfectly straight line cutting on a guided track*  
Eastman's Falcon Air has superior balance and a specially designed Falcon track with air power to decrease heat build-up during cutting. The Falcon Air is perfect for end cutting fusible materials such as heavy rubber and plastic sheeting or for cutting in wet environments where electricity is not applicable.

### Elimination of Fusing

Elimination of overheating the cutting blade (causing fusing)--pneumatically powered

### Accuracy

Stable cutting maintained by the high profile and interior reinforcing ribs

*Contact your Eastman distributor for a professional recommendation to your cutting application.*
