

CFC Foam & Rubber Cutting System

CFC-M (motor only)
(with power cable and on/off switch)

COMPONENTS AVAILABLE SEPARATELY:

BASE:

CFC-B - Base only - for all size machines

DUAL MOVABLE BLADES:

(Sold in sets only - 2 blades)

CFC-BL3 - 3" (70mm), CFC-BL5 - 5" (130mm),
CFC-BL8 - 8" (200mm), CFC-BL12 - 12" (300mm)

STANDARD (COLUMN):

CFC-C3 - 3" (70mm), CFC-C5 - 5" (130mm),
CFC-C8 - 8" (200mm), CFC-C12 - 12" (300mm)

COMPLETE SET CFC--(SIZE)

{consists of motor, base, column (guide), blade set}

Model

CFC-3" **CFC-5"**

CFC-8" **CFC-12"**

Also available in 220 volt and Pneumatic

The CFC is a foam and rubber cutting system in which all the components are sold separately.

- 1: The CFC-M Motor unit is the electro-mechanical body of the system
- 2: The CFC-B Base has rollers for smooth cutting. The column and blades are attached between the motor and the base.
- 3: Select whichever length (*or lengths*) of Column (standard) and Twin Blades desired.

With this system, you can not only have the cutter size you need for one size of cutting, but you can also have more sets of Columns/Blades and switch your CFC cutter size in a matter of minutes. It is much safer and easier to use the cutter length appropriate to the material thickness you are cutting. The CFC System allows you to have up to four sizes using the same CFC-M Motor and CFC-B Base.

MJ FOLEY CO.

SERVING THE INDUSTRY SINCE 1922

Representing the world's leading manufacturers of Industrial Sewing,
Spreading, Cutting & Finishing Equipment.
